

GA22

Brief for SCP Meetings, BAE Systems Warton, December 2008

GA22

The Vision

To provide long endurance, low cost surveillance, deployed incrementally in line with emerging air space regulations.

GA22 – Lighter Than Air

Unique Advantages

- Much smaller than rival airships offering similar payload capacity
- Reduced ground crew requirements
- Easily transportable by any conventional freight method

- Adaptable to different sensor packages

Suitable Roles

- Planned Major Event Surveillance
- Major Incident Surveillance
- Forest Fire Detection and Monitoring
- Communications Relay
- Border Security
- Flood Detection and Monitoring
- Marine and Fisheries Protection
- Earth Observation

Who Are Lindstrand Technologies ?

- Long established Lighter Than Air specialists.
- Proven track record with both hot air balloons and helium filled vehicles.
- Formed by Per Lindstrand and based in Oswestry

Timeline

- Contract signed with Lindstrand Technologies Dec 07.
- Design Review held early July 08.
- Envelope material delivered to LTL 11th July 08.
- First Material Cut 16th July 08.
- Engines delivered to LTL 29th July 08.
- Envelope first inflation 16th Sept 08.
- Gondola delivered to LTL 24th Sept 08.
- First Fin delivered to LTL 26th Sept 08.
- Fins 2 – 4 delivered to LTL 29th Sept 08.
- **FIRST FLIGHT 30th SEPT 08 at Cammell Laird, Birkenhead**

GA22 Conceptual Plan to Autonomy

Baseline Payload – PolyTech COBOLT 350 Turret

- State of the art electro-optical sensors in a gimbal designed specifically for missions such as :
 - o Search and Rescue
 - o Law Enforcement
 - o Surveillance
- Optical Bench sensors include :
 - o IR Large Format Camera
 - o High Definition Video Colour CCD Camera
 - o Video Auto-Tracker
- Proven system in service with many police forces worldwide
- Weight approx. 26kg

GA22 Timescales – What's Next
